1. Receipt is acknowledged of the amendment filed on 3/11/2005.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-7 and 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Binder et al.

Note Figs 1 and 2 and bore 26 with transverse passages 25. It would have been obvious to one of ordinary skill in the art to have not included a check valve in Binder et al so as to allow uninterrupted flow as a matter of removing an element and its associated function.

The use of weep holes in bellows is commonplace. To have removed the additional cover member would have also been obvious to one of ordinary skill in the art as the removal of an element and its associated function.

4. Applicant's arguments with respect to claims 1-7 and 9-12 have been considered but are moot in view of the new ground(s) of rejection.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
